

Proposal for analysis

Please keep the information brief (at most 2 A4s).

Title:

Name:

Date submitted:

1. Background

[should include literature review and key references]

What is the problem you would like to study?

What is known about this topic?

What is the objective?

2. Proposed analysis

[can be bullet points]

3. Data required

[resistance and clinical variables; specify if require full sequence]

4. Prior analysis required to assess feasibility?

If possible, provide a sample size calculation

5. Statistical/technical support required for analysis?

6. Does the study receive funding from commercial companies? If yes please list.

7. Project study group

8. "Authorship will be in line with the EuResist Network collaboration and authorship agreement" (among other: "The number of names listed on the by-line as representatives of the EuResist Network data provider partners is obtained as the maximum number of authors allowed by the journal/congress minus the number of authors who contributed substantially to study")

9. References

Please email to f.incardona@euresist.org

Answers will be given within 4 weeks.

For authorship rules, if you get the permission to use EuResist data you will have to **provide patient ID and seq ID of all the data you use in the study.**
